First and foremost, thank you very much for playing my hack! This is my first attempt at a SMW hack, and I hope you'll enjoy it. Some general notes: there are some wonky colors, backgrounds, and environmental interactions. I was going for a "dream" (think Mario 2) type scenario, so these are intentional. If something happens to glitch, choose "Exit" on the Retry function – it will sort itself out. This hack is meant to be fun and involves platforming and light kaizo. Beginners will find it challenging, but it is easily mastered with practice. 😊

Special note: To defeat Wart, you'll need to hit him just before he shoots bubbles, as was done in Mario 2. He doesn't open his eyes to trigger you.

A special thanks goes out to the SMW Central community: you guys made this possible. All graphics, music, sprites, etc., came from the community. There are far too many people to thank here, so here's your overall shoutout: YOU GUYS ROCK!

Thanks again for playing, and I'll catch you on the next level! Happy Thanksgiving!
